

# Linux OS for Ham Radio

# KM4ACK's build-a-pi Script

**Easily install ham tools using KM4ACK's installation script**

- Clone from git
  - `git clone https://github.com/km4ack/pi-build.git`
- Launch the installer
  - `./pi-build/build-a-pi`
- Select packages
- You may need some credentials depending on what you choose
- Come back tomorrow
