

Linux OS for Ham Radio

KM4ACK's build-a-pi Script

Easily install ham tools using KM4ACK's installation script

- Clone from git
 - `git clone https://github.com/km4ack/pi-build.git`
- Launch the installer
 - `./pi-build/build-a-pi`
- Select packages
- You may need your callsign and some credentials depending on what you choose
- Come back tomorrow
